About the Game:

It is a small Game revolving around 5 levels and a Hard Gameplay where the people who want to play, should Walk around and search for coins in a Dark environment that disables the sense of him seeing, and relying only on his ears. The Player has a tool, that can be enable The search of enemies or the search of coins that beeps when the Chosen one is nearby. The player needs to collect all 5 coins either by evading the ghosts that are coming to catch him or by luring and burning them in the Torches as the ghosts hate light. The character is also helped by god, since he has god's eye nearby that gives him a wider field of view.

How to Play the Game?

An Analog joystick to the left of the Screen allows you to move your character. Search for the coins/ Ghosts (your enemies) by the use of the Coin Radar / Ghost Radar present at the Right bottom of your Screen. The top right part of the screen shows your score and Top left shows your life. The bottom left part of your screen shows the Gods Eye (a Farther view that allows you to see the level better) that keeps blinking.

Phenomenal concept. Darxo made me realize darkness is indeed dazzling, it's just the light that we can't see. I'm gonna keep trying to finish it!

It is a small simple fun game.. Play it till the end (cuz there's only 5 levels) and tell your friends to play too!! You will make your friends play when you finish the game 😊😊
